1. DESCRIPTION OF BUSINESS

Aurion Resources Ltd. (the "Company") was incorporated under the *Business Corporations Act (Alberta)* on April 6, 2006 and was continued into British Columbia on August 10, 2018 under the *Business Corporations Act (British Columbia)*. The Company was listed on the TSX Venture Exchange (the "Exchange") on October 3, 2008. The Company has its registered and records office at 130 Saddlehorn Drive, Kaleden, BC, Canada, and its principal office is 120 Torbay Road, Suite W220, St. John's, Newfoundland and Labrador, Canada. The Company and its wholly-owned subsidiaries are engaged in the evaluation, acquisition and exploration of mineral properties in Canada, Mexico, the United States, Sweden and Finland. The Company plans to ultimately develop the properties, bring them into production, option or lease properties to third parties, or sell the properties outright. The Company has not determined whether these properties contain ore reserves that are economically recoverable and the Company is considered to be in the exploration stage.

These condensed consolidated interim financial statements (the "financial statements") for the three and six months ended June 30, 2022 were authorized for issuance by the Board of Directors of the Company on August 25, 2022.

In March 2020, the World Health Organization declared COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or results of operations at this time.

2. BASIS OF PREPARATION

Statement of compliance

These financial statements have been prepared in accordance with International Accounting Standard ("IAS") 34 *Interim Financial Reporting* in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

Basis of consolidation and presentation

These financial statements reflect the financial position, results of operations and cash flows of the Company and its wholly owned subsidiaries: Minera Aurion de Mexico S.A. de C.V. (Mexico), Aurion Resources (US) LLC (USA), Aurion Resources AB (Sweden), Aurion Resources Oy (Finland) and FennoEx Oy (Finland). All inter-company transactions and balances have been eliminated upon consolidation.

The financial statements of the Company have been prepared in accordance with IFRS on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. The Company does not have any proven economically recoverable reserves, has continuous losses, and, at June 30, 2022, the Company had an accumulated deficit of \$37,563,869 (December 31, 2021 - \$33,876,425). However, management has assessed that the working capital is sufficient for the Company to continue as a going concern beyond one year. The success of the

2. BASIS OF PREPARATION (Continued)

Company and the recoverability of exploration costs are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain financing to fund and complete the development of such reserves, the ability of the Company to satisfy obligations as they come due and upon future profitable production from the properties or proceeds from disposition. The Company's ability to raise additional funds is dependent on favorable conditions in equity and alternative investment markets, which are volatile and subject to significant uncertainty.

The amounts shown as exploration and evaluation assets represent net costs to date, less write-offs and do not necessarily represent present or future values. Although the Company has taken steps to verify title to mineral properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements or transfers and may be affected by undetected defects. If the going concern assumption was not appropriate for these financial statements, adjustments would be necessary to the carrying value of assets and liabilities, the reported net loss and the statement of financial position classifications used.

Basis of measurement

These financial statements have been prepared on a historical cost basis, except for financial assets classified as at fair value through profit or loss, which are measured at fair value. Additionally, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Currency of presentation

All amounts are expressed in Canadian dollars, unless otherwise stated.

3. SIGNIFICANT ACCOUNTING POLICIES

These financial statements should be read in conjunction with the Company's annual consolidated financial statements and accompanying notes for the year ended December 31, 2021. These financial statements have been prepared using the same accounting policies as described in the Company's December 31, 2021 consolidated financial statements.

4. CAPITAL MANAGEMENT

The capital structure of the Company consists of capital and equity comprising share capital, warrants, reserves and deficit. The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The properties in which the Company has an interest are in the exploration stage; as such, the Company has historically relied on the equity markets to fund its activities. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do

so. Management reviews its capital management approach on an ongoing basis which remains unchanged since June 30, 2022. The Company is not subject to externally imposed capital requirements.

5. FINANCIAL INSTRUMENTS

Financial instruments recorded at fair value on the consolidated statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 – valuation based on quoted prices (unadjusted) observed in active markets for identical assets or liabilities

Level 2 – valuation techniques based on inputs that are quoted prices or similar instruments in active markets; inputs other than quoted prices used in a valuation model that are observable for that instrument; and inputs that are derived principally from or corroborated by observable market data by correlation or other means

Level 3 - valuation techniques with significant unobservable market inputs

The Company does not have any level 2 or 3 fair value measurements, and there have been no transfers between levels.

Financial Risk Factors

The Company has exposure to credit risk, liquidity risk and market risk. The Company's Board of Directors has the overall responsibility for the oversight of these risks and reviews the Company's policies on an ongoing basis to ensure that these risks are appropriately managed, which are summarized below:

Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to receivables, which is mainly comprised of government tax refunds. Management believes that the credit risk concentration with respect to financial instruments included in the receivables is not significant. The Company holds cash and invests it in interest bearing deposit accounts at its financial institution. Management believes that the associated credit risk for its invested cash is low.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. As at June 30, 2022, the Company had cash and cash equivalents of \$14,959,357 to settle current liabilities of \$1,207,849. To the extent that the Company does not believe it has sufficient liquidity to meet its current obligations, the Board of Directors considers securing additional funds through equity or partnering transactions. All of the Company's financial liabilities are short-term in nature and are subject to normal trade terms.

Market risk

Market risk is the risk that changes in market prices, such as interest rates, foreign exchange rates, and equity prices will affect the Company's income or the value of its financial instruments.

(a) Interest rate risk –The Company's current policy is to invest excess cash in either interest bearing deposit accounts or Guaranteed Income Certificates ("GICs") issued by its financial institutions. Management believes it has minimal exposure to interest rate risk.

As at June 30, 2022, the Company held \$13,014,041 in short term investments (December 31, 2021 – nil). As at June 30, 2022, the carrying value of the Company's short-term investments was \$13,050,205 (December 31, 2021 - \$nil) including \$36,164 of accrued interest (December 31, 2021 – \$nil).

5. FINANCIAL INSTRUMENTS (Continued)

(b) Foreign exchange risk - The Company transacts certain business in Euro, Swedish Kroner, U.S. Dollars and Mexican Pesos, and therefore is subject to foreign exchange risk on certain receivables, trade payables and cash balances. The Company attempts to mitigate these risks by managing its foreign exchange inflows and outflows. No hedging instruments have been used by the Company, however, depending upon the nature and level of future foreign exchange transactions, consideration may be given to the use of hedging instruments. The Company believes that it adequately manages its foreign exchange risk, and the risk is minimal.

The following table shows the net exposures in US dollars, Swedish Kroner and Euro at June 30, 2022.

	US\$	Euro	SEK
Cash	58,737	1,023,099	20,930
Receivables	-	303,582	3,931
Trade payables	(18,590)	(204,797)	-
Net currency exposure	40,147	1,121,884	24,861

Based on the above currency exposures, a 10% change in the value of each currency to the value of the Canadian dollar would impact the Company's net loss by:

US\$	Euro	SEK
4,015	112,188	2,486

(c) Equity risk – The Company is exposed to market risk because of the fluctuating values of its publicly traded marketable securities. The Company has no control over these fluctuations and does not hedge its investments. Based on the June 30, 2022 value of the marketable securities every 10% increase or decrease in the share prices of these companies would have impacted the loss for the year, up or down, by approximately \$442,000 (December 31, 2021 - \$501,833).
